DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Figure 3

2. Claims 1-2, 5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Takayoshi (JP 2000165995).

3. Considering claims 1 and 2, Takayoshi (Figure 3) teaches a piezoelectric element (1) for transmitting and receiving ultrasonic waves (paragraph 0003); a backing load member (6) placed on a rear surface of said piezoelectric element; and a heat conduction material which is placed inside said backing load member (7) or a part

thereof and whose thermal conductivity is greater than a thermal conductivity of said backing load member (paragraphs 0017 + 0044).

4. Considering claim 5, Takayoshi teaches a heat radiating block which is connected to said heat conduction material and whose thermal conductivity is greater than the thermal conductivity of said backing load member (paragraph 0047).

5. Considering claim 9, Takayoshi teaches wherein said heat conduction material, any material of PGS graphite sheet with high degree of orientation where polymeric film is graphitized, graphite, carbon nano-tube, aluminum nitride, boron nitride, silicon carbide, beryllium oxide, copper and aluminum is used (paragraph 0019).

Response to Arguments

6. Applicant's arguments, see pages 6-8, filed 27 May 2008, with respect to the rejection(s) of claim(s) 1-2, 5 and 9 under Koichi have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Takayoshi.
